

Clarification 2.

RFQ/2018-003

for

Technical Translation Firms – Specialising in Renewable Energy & Energy Sectors.
Translation & Multi Lingual InDesign layout and Replication Services.

With respect to the above reference Request for Quotation (RFQ) the following inquiry was received by IRENA.

Please find below the question under reference and our response.

The Question: ... ,, regarding the Turnaround times for the RFQ.

When you talk about delivery time for translation in page 7 of the RFQ ... [we assume] you need the turnaround time for the service of Translation + Revision, right? Not just translation“.

Response: We [IRENA] envisaged those “turnaround times” as a company’s actual working time for translation and implementing our corrections, but excluding any intervening days for us to review the document at this end.

These are indicative times only, based on our best estimates of the time needed on the other (i.e. contractor’s) side of the process. We would welcome revisions to the times or explanatory details based on your company’s experience that may help us fully appreciate your proposed pricing scheme.

Note: Bid closing deadline – Thursday, 19 April 2018, 14.00 H GST.

All other Terms and Conditions shall remain unchanged.
