

South East Europe Workshop on Grid Integration of Variable Renewable Energy Sources

7 November 2018, Vienna

Agenda

	, Sperida
08:45 - 09:00	Welcome coffee
09:00 – 09:40	 Welcome remarks IRENA, Energy Community Secretariat, DG ENER Smart and Clean Energy for All Europeans – the way ahead to 2030, Pierre Loaec, DG ENER Legal requirements for access to and operation of grids with renewable energy Gabriela Cretu, Energy Community Secretariat
09:40 - 10:40	Session II: Planning for the future clean, competitive and secure energy systems
	• Factors influencing the long-term planning for VREs: Challenges and Opportunities Dolf Gielen, Director Innovation and Technology Center IRENA
	 Challenges in planning RES integration into electricity systems in a competitive and sustainable way Katerina Karali, Electricity Expert
	 Planning a system with a high share of renewable energy in Germany – interface between scenario planning, network planning, and operational planning Dennis Volk, Bundesnetzagentur
10:40 - 11:00	Coffee break
11:00 – 11:45	Session III: Experiences of Contracting Parties Round table discussions: Long-term planning of energy systems with higher shares of VREs - Contracting Parties' presentations
11:45 – 12:30	Session IV: A market design fit for renewable energy
	 Importance of market design for the uptake of VREs Emanuele Bianco, IRENA
	 A market design for a future renewable-based energy system - a regulatory perspective Elena-Loredana Ocenic, ACER
	 Redesign of the electricity market - options for flexibility Laurens de Vries, EERA Energy Systems Integration Joint Programme Coordinator, Associate Professor, TU Delft
12:30 – 13:00	Panel discussion on best practices, gaps and the way forward on future integrated planning and market design
13:00 – 13:45	Group photo and Lunch break

13:45 – 15:15	Session V: A Balancing Act: Power System Flexibility
	 Power systems flexibility: sources of flexibility and flexibility assessment (IRENA FlexTool); lessons from front runners Gayathri Nair, IRENA
	 Unlock power system flexibility through improved operational practices Hannele Holttinen, Coordinator of IEA Task 25 - Design and Operation of Power Systems with High Amounts of wind power
	 Experiences of TSO in ensuring flexible power system Nuno Martins, REN Portugal
	 Digital applications to support the energy transition: Using blockchain to unlock grid flexibility Jan Vorrink, TenneT
	 Options for additional flexibility from sector coupling – electrification of heating and transport sectors Laurens J. de Vries, EERA Energy Systems Integration Joint Programme Coordinator, Associate Professor, TU Delft
	 Energy Storage: A key flexibility resource Patrick Clerens, European Association for Storage of Energy (EASE)
15:15-15:30	Coffee break
15:15-15:30 15:30-16:40	Coffee break Session VI: Grid Integration of Variable Renewable Energy
	Session VI: Grid Integration of Variable Renewable Energy • Data access, innovation and integration of renewable energy
	 Session VI: Grid Integration of Variable Renewable Energy Data access, innovation and integration of renewable energy <i>Georg Rute, Elering (Estonia)</i> Challenges and solutions for the interconnected power systems
	 Session VI: Grid Integration of Variable Renewable Energy Data access, innovation and integration of renewable energy
15:30 – 16:40	 Session VI: Grid Integration of Variable Renewable Energy Data access, innovation and integration of renewable energy
